- Year-end Numbers
- Plans for 2019-2020
- Approved Graduate Courses Reminder
- Equity & Inclusion
- Friendly Reminders

CIS 2018-2019 by the numbers...

As we wrap up the 2018-2019 academic year, we wanted to share our yearly statistics!

Enrollment: 233 (unduplicated)

Partner schools offering classes this year: 7 (not every school offers classes each year)

High School Teachers Using the HLC Extension: 2

Courses offered in 2018-2019: Biology, English Comp I & II, Western Civilization, Agronomy, Nursing Assistant, Principals of Marketing, and Entrepreneurship.

Looking Ahead to 2019-2020

If you haven't already, please let us know your plans for the upcoming academic year so we can assist you with the application process.

While we already offer courses at ACGC and MACCRAY, we are excited to have additional classes on their roster for next year! Want to look at adding a course or start a partnership with us? Feel free to reach out to Kelley McClure Mork at 320-222-5210 or via [email](#).

Approved Graduate Course List

Do you have high school instructors teaching general education classes and are on the HLC extension (either with us or with another institution)? Are they taking courses through the Minnesota State system? If so, please be sure that they're taking courses from the approved course list (a copy is attached). This list is updated regularly to ensure that the courses taken align with discipline-specific content, not just pedagogy methods. Currently, Ridgewater has 2 instructors taking classes to earn the 18 credits in their discipline (with 2 more next year) who report to us yearly on their progress. If you have questions about the HLC extension, please contact Kelley McClure Mork.

Equity & Inclusion Discussion

Ridgewater College continues to explore ways to provide access and opportunity for all students. This includes exploring ways to connect more students in our partner districts to quality college courses. This will be a topic for our 2019-2020 advisory board meeting and we look forward to partnering with you on innovative and collaborative ways to bring offerings to more students across our region.

- Got a class starting in September? We'll want to work on getting those applications collected and testing scheduled BEFORE your school year ends!
- Remember to send us a class list—including the student's home address—so we can mail students & their families important College in the Schools information later this summer (as required by NACEP)

APPROVED GRADUATE COURSE LIST

The following graduate courses are eligible to be marketed and offered to high school instructors to complete in fulfillment of Minnesota State's college credentialing requirements. Likewise, successfully completed courses appearing on this list must be accepted by all Minnesota State colleges and universities when determining a high school instructor's eligibility to teach within the corresponding field.

Note that not all courses may be offered every semester. High school instructors interested in registering for courses that do not appear on this list should consult the local pre-approval process of their desired concurrent enrollment partner prior to registration to ensure eligibility. Information regarding registration can be found via [18 Online](#) (for courses associated with Minnesota State University Moorhead) and the Statewide Partnership for Concurrent site coordinated by the [Metropolitan Educational Cooperative Service Unit](#) (Metro ECSU). Additional course information can also be found via each university's website.

In addition, while all the courses listed below have been reviewed and approved as part of the Minnesota State concurrent enrollment credentialing pathways, high school instructors should note that some of the courses listed below may **not** be eligible for the state funding coordinated through Metro ECSU. Funding is generally restricted to online or, for courses with lab components, hybrid/blended delivery formats (not to exceed two face-to-face or onsite sessions). High school instructors seeking to access and use funds to enroll in one of the courses below should consult with their desired funding source before registration to ensure eligibility.

This course list will continue to be updated as new courses are reviewed and approved. If you have questions or concerns about the course review process or have questions about the eligibility of one or more of the courses listed below, please contact Interim System Director of P-20 and College Readiness, Greg Rathert, at Greg.Rathert@minnstate.edu. Questions regarding registration and basic course information (course schedule, syllabi, course requirements, etc.) should be directed to the faculty of record or the university at which the course is being offered.

Thank you for your interest and for partnering with Minnesota State colleges and universities as we continue to grow and strengthen our concurrent enrollment credentialing pathways and the programs they support.
